

Making paper fun

ColorLok® Papers

The New Standard for Better Printing

The evolution of today's digital office printing equipment, along with the desire for more colorful, impressive-looking documents, has driven the need for a better printing solution: ColorLok® papers. With ColorLok papers, color is more persuasive. It provides paper with advanced technology for all office printing equipment, allowing you to achieve superior printing results. Whether using ColorLok papers in the office or at home, you can rely on consistent, high-quality documents from all of your office printers and copiers. With inkjet printers, ColorLok paper provides more vivid colors, bolder blacks and faster drying times. And with all other laser printers and copiers, you'll get consistent, quality results.

Domtar is pleased to be involved with this new standard for better printing. Look for the ColorLok logo on many of our business and office paper products.

Benefits of ColorLok Papers

- More vivid colors & bolder blacks
- Faster drying times
- Long life for laser printers
- Optimal results for all printers and copiers

Ordinary Paper

Faster dry-time is just the beginning. Documents printed on Domtar Papers with ColorLok Technology feature blacks that are noticeably bolder.

Paper with ColorLok

Special additives prevent black inks from penetrating too deeply into the sheet, resulting in improved optical density (you'll call it bolder words, graphics and pictures).

Just as ColorLok papers keep black inks near the surface, it also prevents color inks from being absorbed too deeply, making them appear uniform, vivid and vibrant! To learn more please visit <http://www.colorlok.com/>
